

Project Description/Scope of Work

This application is for the addition of 1,000 square feet of seasonal outside seating for a restaurant use.

The existing building is primarily office use but has some educational and a small amount of restaurant use. Parking is provided in a garage located below the building.

A 1,000 square foot area located in front of the restaurant use is to be reconfigured, paved and secured with a railing so that tables can be set up and used by the associated restaurant.
